MANAGEMENT

MG43-1 Redesigning Work for Greater Impact

This course explores how to redesign roles, processes, and ways of working to maximise impact rather than effort. It addresses a common challenge in organisations — teams are busy, but not always focused on what truly drives results. Participants will learn how to realign work with strategic priorities, cut through unnecessary complexity, and remove low-value activity that consumes time without adding value. The session provides practical tools to help individuals and teams focus their effort where it delivers the greatest return, improving both efficiency and business outcomes.
