PROJECTS, LOGISTICS, QUALITY & AUDIT

PL40-2 Practical Project Management Foundations

This hands-on programme provides participants with a clear and practical introduction to project management. Covering the full project lifecycle, the course equips professionals with essential tools and techniques to plan, deliver, and close projects effectively, while ensuring strong communication with stakeholders throughout.

Course Information

Duration: 2 days

London (£1980): 21st September 2026, 9th November 2026, 18th January 2027, 15th March 2027, 10th May 2027, 12th July 2027, 13th September 2027, 15th November 2027, 17th January 2028, 20th March 2028

Companies nominating 3 or more delegates to attend the same programme will enjoy a special discount on the course fees.

Upon completion of one of our CPD certified courses, delegates will be awarded both an LMC certificate and a CPD certificate. No examination required.

Who is the course suitable for?

This course is designed for professionals who manage projects alongside their primary role, including coordinators, specialists, and managers without formal project management training. It is suitable across a wide range of sectors, including public services, finance, education, and small to medium-sized enterprises.

Course profile

Project Planning Fundamentals

- Introduction to project management and defining a project
- Setting objectives and establishing project scope
- Roles and responsibilities within a project environment
- Developing basic project plans, including milestones and work breakdown structures
- Estimating timeframes and resource requirements

Project Delivery and Control

- Identifying and mitigating project risks
- Stakeholder mapping and engagement strategies
- Monitoring progress and status reporting
- Managing changes within a project
- Project closure, lessons learned, and close-out checklist

Competencies

At the end of this course, delegates will be able to:

- Understand the key stages of the project lifecycle from initiation through to closure
- Define clear project objectives and scope
- Apply core project management tools, including planning, risk management, and resource estimation
- Communicate effectively with stakeholders and provide clear project updates
- Manage changes in a structured and controlled manner
