PL16 Effective Project Procurement Management

This comprehensive course designed to enhance the skills and competencies of professionals involved in project procurement. The course equips participants with practical tools and modern approaches to manage procurement processes effectively, ensuring the timely and cost-efficient acquisition of essential services and materials. Participants will learn to balance immediate project needs with long-term cost considerations, manage procurement teams, navigate legal and contractual challenges, and implement contingency plans. This course emphasises real-world applications, providing delegates with actionable strategies and insights to improve their performance and prepare for workplace challenges at their professional level.

Course Information

Duration: 5 days

London (£4950): 20th July 2026, 14th September 2026, 2nd November 2026, 11th January 2027

Companies nominating 3 or more delegates to attend the same programme will enjoy a special discount on the course fees.

Upon completion of one of our CPD certified courses, delegates will be awarded both an LMC certificate and a CPD certificate. No examination required.

Who is the course suitable for?

This engaging course is tailored for Project Managers, Directors, and Managers with project management responsibilities, as well as those directly involved in project procurement. It is also invaluable for managers who interact with procurement professionals, including technical procurement specialists and leaders of teams focused on critical procurement functions. Participants will gain advanced skills to stay at the forefront

of their fields and ensure effective procurement management within their organisations.
