

## HUMAN RESOURCES MANAGEMENT

# **HR36** Human Resources Management Using Data and Analytics

This comprehensive course, equips HR professionals with the essential skills and knowledge to effectively integrate data analytics into human resources practices. Attendees will learn to capture and analyze HR data, creating actionable insights that align with and advance business strategies. The course covers the strategic role of HR in shaping business outcomes, mastering HR analytics for decision-making, cultivating a positive organisational culture, optimising the employee lifecycle through data-driven methods, and robust HR reporting and risk management. Through interactive workshops, case studies, and real-world applications, delegates will develop an understanding of how to use data to influence recruitment, performance management, and employee retention.
