

LEADERSHIP & STRATEGY

LE96 Artificial Intelligence for Business Leaders

In today's rapidly evolving business landscape, leaders must adapt to the integration of artificial intelligence (AI) to maintain a competitive edge. This course equips senior executives with the knowledge and practical tools to leverage AI effectively within their organisations. Participants will gain a strategic understanding of AI's impact on decision-making processes, enhance their ability to lead AI-driven initiatives, and develop approaches to foster a responsible and ethical AI culture. By focusing on real-world examples and applications, this course prepares business leaders to harness AI technologies to drive innovation, improve efficiency, and make informed decisions that align with the organisation's goals.

Course Information

Duration: 5 days

London (£4950): 2nd February 2026, 27th April 2026, 22nd June 2026, 10th August 2026, 5th October 2026, 23rd November 2026, 1st February 2027
